Yes, thanks for the reminder on that. By the way, what is the official title of your new position? ORD Technology Liaison or something like that?

Just realized – you will probably also want to let the other section managers know that there will need to be a new site strategies person and a new PFAS coordinator to help Rob.

Subject: Site summaries

Hi Terese,

I've attached site summaries for all of my sites to this email.

My recommendations for RPMs are as follows:

1. Adams Plating – can go to anyone with time to juggle the various contracts. Some hydro experience would be great because of the discontinuous till onsite and engaging with the state geologist, but we are getting contractors onboard, so it shouldn't be necessary.
2. Evergreen Manor – can go to anyone
3. H100 – is going to Danny
4. Jen-Wright – should go to someone who is able to multitask (ha)
5. North Shore Drive – can go to a new RPM looking for RI experience
6. Ormet – can go to anyone detail oriented. The PRP likes to cut corners
7. South Andover – should go to someone with hydro experience and **Ex. 7(A)**
8. Spartan – can go to anyone
9. WPSC – can go to anyone
